Song of Solomon has actually usually been instructed in modern-day churches as a metaphor for Christ and the Church, this is a later distortion. While very early Jewish tradition did consist of symbolic analyses, the message was initially recognized as sexual verse, celebrating sexual union within love and marriage. It wasn't till the rise of Christian asceticism in the 3rd 4th century, especially after the Council of Nicaea, that theologians like Augustine began to spiritualize the message and subdue its erotic literalism. This change showed a more comprehensive theological pain with the body, pleasure, and particularly female sexuality one that has deeply shaped how generations of ladies have actually been instructed to see themselves, their need, and their role in marriage. And truthfully this deeply distresses and discourages me.
